The SYSTEMS Depot®

WE OFFER:

TRAININGS

Comprehensive training opportunities, led by manufacturers, available both in-house and virtually.

COUNTER SALES

Each branch has experienced and committed sales representatives available at our sales counter to assist in finding what you need quickly and efficiently.

INVENTORY MANAGEMENT

Streamlined inventory management strategy, emphasizing reduced on-hand inventory, enabling swift adaptation to new product models without reliance on existing stock.

ORDER ONLINE

Access our user-friendly 24/7 website for efficient and convenient order processing.

campus safety
collection

Dive into the various territories of campus safety, where the concept exceeds mere locks and barricades. Discover the innovative solutions and diverse range of offerings by Honeywell brands that redefine how we can safeguard educational institutions.

Fire-Lite Audio Amplifier Module `FIRECC50100`

The Audio Amplifier Module from Fire-Lite is an amplifier used for ECC-50/100 and ECC-50/100E that are multipurpose emergency voice evacuation panels for *fire applications*, *mass notification applications*, or both. This product has two configurations of 25V and 70V. When these products are operated with second speaker circuit it increases the total ECC-50/100 power output to 100 watts or can also be used as a backup amplifier.

Brand: Fire-Lite

Wall Speaker Strobe `SYSSPSRL`

The System Sensor SRL-SP, a high-quality red wall-mounted strobe with the word FIRE printed in red and a clear lens, is a great option for emergency communication applications. System Sensor's L-Series, which includes a wide range of devices, is the most versatile and comprehensive line of notification devices available. This line includes the popular System Sensor SRL-SP, as well as other devices that can meet the requirements for emergency communication applications.

Brand: System Sensor

SYSTEM SENSOR

Ceiling Speaker Strobe `SYSSPSCWK`

SpectrAlert Advance from System Sensor offers the broadest line of outdoor speakers and speaker strobes in the industry. From metal and plastic outdoor back boxes, to white and red plastic housings, to wall and ceiling mounting options, SpectrAlert Advance can meet virtually any application requirement. Ceiling-mount outdoor speakers and speaker strobes can be used indoors or outdoors in wet or dry applications, and can provide reliable operation from -40°F to 151°F. These speakers provide a broad frequency response range, low harmonic distortion and maintain a high sound pressure level at all tap settings to provide accurate and intelligible broadcast of evacuation messages.

Brand: System Sensor

SYSTEM SENSOR

Voice Evacuation System `SILSKE450`

The SKE-Series Voice Evacuation system provides 50 watts of output power. The SKE-Series system consists of several different models, the SKE-450, SKE-450-ZN4 or SKE-450-ZN6. Each model has a built in Digital Message Repeater, power supply and a supervised microphone. All models have two alarm inputs, one triggered by reverse polarity and one by supervised dry contact trigger. The system supports 25 or 70.7 VRMS operation to accommodate most installations. The audio messages are field programmable via the built in microphone, through the line level input, or by downloading via the internet.

ENHANCED
MONITORING

WHAT IS MONITORING?

The International Code Council (ICC) and the National Fire Protection Association (NFPA) model codes require fire alarm systems to send alarm signals to a central station.

WHAT MAKES OUR OFFERING ENHANCED?

Live Fire System Status

Leverage mobile and web apps to get the status of your fire system on the go. You can have unlimited users to receive the status and notifications.

First Responder Emergency Support

Your fire system can now send important details directly to first responders when your building is in alarm. Give first responders as much context as possible when your property needs it most.

Read more here or visit go.honeywell.com/honpartners

Easier, More Reliable Alarm Response

Response time matters. With Enhanced Monitoring, we replace manual, time-consuming phone calls to first responders with digital alerts, saving minutes in response time where available.

Watch the video here or visit go.honeywell.com/alarmjourney

CONNECTED LIFE SAFETY SERVICES (CLSS)

GETTING STARTED

> **We partner with the industry so you don't have to. Enhanced Monitoring can be activated with Honeywell communicators, partner communicators, or directly with central stations. Ask how we can get your site protected today.**
